

Montgomery County GreenBank

Your partner for clean energy™

- Tuesday, October 20th, 2020
- 6:30pm – 7:30pm EST
- Details below

Webinar Announcement: How can I install and finance solar panels on my home within a homeowners association?

Mark your calendar now for “Solar for Homeowners Association Members” – a webinar sponsored by the nonprofit Montgomery County Green Bank in partnership with the Commission on Common Ownership Communities and Solar Energy World. This will provide a basic overview on installing solar PV systems on homes that are governed by an association.

Montgomery County **GreenBank**

Your partner for clean energy™

Webinar details: The Montgomery County Green Bank and the Commission on Common Ownership Communities are partnering with Solar Energy World to inform on how solar works, how *your* system can be designed for *your* home in *your* association, and the roles that your association might have with respect to your solar project. Important financing details will be discussed during the webinar including what investment tax credits are and how you can access them, how solar energy renewable credits work, and which factors determine your rates and monthly payments. Information will also be provided on how Green Bank supported financing can be a great source to help you finance your projects. Please bring your questions for our Q & A segment and learn how solar can work for your home.
